Prior to participating in a designated University Interscholastic League (UIL) program or other District extracurricular program identified by the Superintendent, a student shall undergo a physical examination annually and shall submit a statement from an authorized health-care provider indicating that the student has been examined and medically cleared to participate in the program.

The District shall assess the physical fitness of students in grades 3–12 on an annual basis, as provided by state law and Commissioner Rule, and as specified in the District’s administrative regulations.

At the request of a student’s parent or guardian, the District shall, at the end of the school year, provide to the parent or guardian a copy of his or her child’s physical fitness assessment results.

The District may provide additional screening as District and community resources permit.

Parents of students identified through any screening programs as needing treatment or further examination shall be advised of the need and referred to appropriate health agencies.

A school nurse or administrator who discovers or becomes aware that a child enrolled in a District elementary school has lice shall provide written or electronic notice to parents within the time frames prescribed in law.
